

TECHNICAL JOBS IN NORTHVOLT (NORTH OF SWEDEN)

Some of Europe's largest companies have put their faith in Northvolt. To make green batteries of the highest standard, we need people like you to help us drive this mission forward. Passionate problem-solvers who would like to make a meaningful impact and shape history together with us.

- Maintenance Technician:

As a Maintenance Technician you will work in our top modern facility in Skellefteå, Sweden, making sure that machinery and production equipment are kept in good condition, and receive the service needed to prevent downtime. Should downtime occur, however, you will help to investigate what's wrong, how to fix it and learn how it can be avoided in the future. The work is critical to keeping production lines working optimally. More info: [Maintenance Technician - Northvolt | Jobylon](#) **Apply HERE:** [Apply to Maintenance Technician at Northvolt | Jobylon](#)

- Process Operator – Manufacturing associate:

As an Operator, you'll work at the heart of Northvolt – where battery cells are manufactured. Key duties involve control and monitoring of the machines, re-filling material and contributing to continuous improvements on the line. Precise tasks and what your working day looks like depend on where in production you work. In some Operator roles you don't work close to machines, but instead service workstations with materials, ensure batteries are packed and ready to leave the factory, or support production in other vital ways. You will work in in close collaboration with other operators, shift leaders, maintenance, quality and environment personnel. More info: [Process Operator - Manufacturing Associate - Northvolt | Jobylon](#) **Apply HERE:** [Apply to Process Operator - Manufacturing Associate at Northvolt | Jobylon](#)

- Process operator – Upstream:

As an Upstream Process operator you have a good chemical understanding, as well as experience from working in a production setting with ongoing process. We believe you have experience in reading process and electrical drawings as well as a good understanding of equipment as pipes, pumps and valves. You might have a relevant background from production in steelworks, cement, pharmaceuticals, cosmetics, active materials or oil & gas. More info: [Process Operator Upstream - Northvolt | Jobylon](#) **Apply HERE:** [Apply to Process Operator Upstream at Northvolt | Jobylon](#)

- CNC Operator:

You will be working intimately with technicians, engineers and other production personnel. Your main focus will be on manufacture of high precision components using a range of CNC and manual Machine tools which are required to support the mass manufacture of lithium ion cells. More Info: [CNC Operator - Northvolt | Jobylon](#) **APPLY HERE:** [Apply to CNC Operator at Northvolt | Jobylon](#)

- Material Handler:

As a Material Handler, you will be responsible for loading and unloading waste, materials and cells in accordance with current routines and guidelines. You will also handle waste materials. In your role as Material Handler, your main tasks will involve: - Loading and unloading - Documents and packaging controls - System update - Continuous improvement on current processes.
